

Data (Effective Use of Resources) Services Workgroup

Priorities Update & Report

2005-2008 Regional Plan Priorities

GOAL: Increase screening coverage in an identified and prioritized high risk group.

- Objective 1: By 10/1/05 each state's IPP representatives will meet to identify high risk populations included in the IPP project
- Objective 2: By 12/31/05, determine appropriate allocations for screening identified populations

2009-2011 Regional Plan Priorities

Region VIII Goal & National IPP Priority Area:
Incorporate analysis of regional prevalence monitoring data for regional and local data-directed program planning.

- Objective 1: Establish a regional baseline to measure how effective Chlamydia screening is in currently participating screening sites for women as well as current adherence to screening criteria.

2009-2011 Regional Plan Priorities

Region VIII Goal & National IPP Priority Area:
Incorporate analysis of regional prevalence monitoring data for regional and local data-directed program planning.

- Objective 2: Assess current data to determine which variables/elements are useful to the Region for making decisions; streamlining will allow for better data collection and will result in more complete data sets.

2009-2011 Regional Plan Priorities

Region VIII Goal & National IPP Priority Area:
Incorporate analysis of regional prevalence monitoring data for regional and local data-directed program planning.

- Objective 3: Identify trends in the number of Chlamydia screenings performed over time according to age, gender, and population/agency (e.g. family planning, community health center).

2009-2011 Regional Plan Priorities

Region VIII Goal & National IPP Priority Area:
Incorporate analysis of regional prevalence monitoring data for regional and local data-directed program planning.

- Objective 4: Update Region VIII IPP Chlamydia Reinfection Analysis to include through CY 2008.
- Objective 5: Develop a Region VIII IPP specific recommendation for screening males for Chlamydia by conducting an assessment of Chlamydia positivity in males in all Region VIII project areas in new venues.

2009-2011 Regional Plan Priorities

Region VIII Goal & National IPP Priority Area:
Incorporate analysis of regional prevalence monitoring data for regional and local data-directed program planning.

- Objective 6: Identify what percentage of eligible women are being screened on an annual basis among select sites participating in the Region VIII IPP.
